Who can use our virtual power plant?

Power traders, aggregators, energy providers and grid operators already control thousands of distributed energy resources with our trend-setting technology. Our Virtual Power Plant is used in many international markets and can be flexibly adapted to the requirements of electricity markets, users and existing IT infrastructure.

What is a virtual power plant?

Thus we turn distributed energy resources into a single power pool whose generation you can flexibly adjust to grid requirements or trade profitably on international spot, intraday and balancing power markets. In addition, the Virtual Power Plant covers the new grid management (Redispatch 2.0) processes with a focus on the role of the dispatcher.

What is a virtual power plant (VPP)?

Our market-leading Virtual Power Plant (VPP) connects distributed energy resources (DER) and enables you to monitor, remote-control and trade their power generation.

What is the communication infrastructure in medium-voltage and low-voltage distribution systems?

The communication infrastructure in the medium-voltage and low-voltage distribution systems is usually heterogeneous, and the suitable technologies depend to a large extent on the local topology (large city, rural region, distances, etc.). It must therefore be specifically tailored for each customer.

The 150KW/372KWh Outdoor Cabinet Energy Storage System, made by Huijue Group, is an integrated cabinet enclosure that contains batteries, Battery ...

The Alpha#174; NPS Enclosure node power supply cabinet is specifically designed for indoor or outdoor installations requiring lower power, a smaller footprint, and embedded DOCSIS#174; or proprietary ...

The MT Series delivers 150 to 250 kW of programmable DC power per floor-standing cabinet, using high-frequency IGBT current-fed power processing and integrated AC input breakers for robust, high ...

The 150KW/372KWh Outdoor Cabinet Energy Storage System, made by Huijue Group, is an integrated cabinet enclosure that contains batteries, Battery Management System, Energy ...

Dual DSP design provides stable and reliable performance. Reliable parallel connection capability allows for convenient power expansion, supporting up to ...

# 150kW Spain Communication Power Supply Cabinet for Virtual Power Plant
