This solar-powered cold chain revolution offers a powerful solution for Ghana and beyond. By empowering farmers with affordable, accessible cold storage through PAYGO financing, we can ...

Ghana has installed a massive solar photovoltaic power system at the Bui Reservoir, reducing land use and boosting renewable energy production. The project can also protect aquatic life from overheating.

Maximize water use efficiency for plant irrigation by decreasing evapotranspiration from soil and crop canopies. Improve PV efficiency by lowering underside temperatures of the panels ...

Huawei Digital Power has agreed to provide the complete solar PV and energy storage system (ESS) solution for what looks set to be the biggest project of its type in Africa ...

By empowering farmers with affordable, accessible cold storage through PAYGO financing, we can significantly reduce food loss, ...

We supply high-capacity lithium-ion battery systems tailored to West Africa's demanding environments, empowering factories, farms, and businesses to slash operational costs and achieve ...

Strengthening the capacities of power distribution utilities to scale up photovoltaic installations for households and SMEs, and boost private sector investment in climate friendly technologies.

This will be Ghana's first hybrid plant utilizing both solar and hydro resources to generate and supply power to the national grid. In October 2019, ...
