-----

The first embodiment of this work is an AC-to-DC sidecar power rack that disaggregates power components from the IT rack. This solution improves ...

Cooling often contributes to 40% or more of total facility energy use in legacy builds. Rack power density has risen from 2-5 kW/rack a decade ago to over 30 to 50kW/rack in high-performance clusters ...

Readers of this technical guide are likely seeking insight into how to deploy liquid cooling to support rack densities up to, and in some cases exceeding 50 kilowatts (kW) per rack.

For example, Delta recently released the Modulon DPH 500 kVA modular UPS for large data centers that only takes up a space of a 19" rack cabinet and provides ...

GPU racks hit 50kW thermal limits. Liquid cooling delivers 21% energy savings, 40% cost reduction. Essential guide for AI infrastructure teams ...

The BATTLINK 50kWh C& I Energy Storage System optimizes energy use for businesses by reducing costs, enhancing efficiency, and ensuring reliable power. With smart monitoring, modular scalability, ...

Schneider Electric's new line of solutions equips customers with integrated, data-validated, and easily scaled white space solutions that address new challenges in pod and rack ...

Daikin delivers end-to-end solutions for every space in a data center, wall-to-wall. Our offerings include rack-space cooling and other mission-critical space cooling such as UPS rooms, battery rooms, ...
