Why is ASEAN emerging as a data center market?

ASEAN is emerging as a key market for hyperscale and edge data centers, supporting real-time processing needs for fintech, gaming, industrial automation, and smart city applications. 3. Governments Are Actively Supporting Data Center Expansion

How big is ASEAN data center capacity?

According to the ASEAN Centre for Energy (2024), ASEAN currently has around 1.5 gigawatts (GW) of operational data center capacity, with more than 500 megawatts (MW) under construction and nearly 2 GW in the planning stage.

Why should you invest in ASEAN data center?

ASEAN's evolving data center landscape is unlocking new business models, investment strategies and infrastructure innovations. Operators, equipment manufacturers and investors stand at the forefront to benefit from this growth trajectory fast growth of the market, which includes:

How is data centre capacity in ASEAN compared to evolved markets?

On current data centre capacity per capita (MW per million population), installed capacity in ASEAN is just one third or ~32% compared to the evolved markets. On current data centre capacity to GDP (adjusted for purchasing power parity), installed capacity in ASEAN is just one half or ~46% compared to the evolved markets.

These factors contribute to a dynamic and evolving market for servers and data centers in ASEAN.
