What is the difference between a solar PPA and a lease?

The key difference between a solar PPA and a lease is what you're technically paying for. In a lease, you pay for the equipment. In a PPA, you pay for the power that equipment produces. Both leases and PPAs are collectively referred to as third-party ownership. With both, you forego the cost of purchasing panels and make monthly payments.

What are the different types of residential solar financing?

This guide is designed to help homeowners navigate the complex landscape of residential solar photovoltaic (PV) system financing and select the best option for their needs. It describes three popular residential solar financing choices--leases, PPAs, ...

Can PPAs make economic sense for campus solar?

The National Renewable Energy Laboratory's fact sheet provides guidance to universities on the process of using PPAs and how PPAs can make economic sense for campus solar deployment. This document can support university stakeholders charged with the financial planning of campus solar projects.

How long does a LightReach energy lease last?

Leases typically last for 20 to 25 years. Some, like the LightReach Energy Plan, have the option to buy out the lease starting after year five. Disclaimer: This content is for educational purposes only.
