ABB industrial drives are designed with current ratings to be used in industrial environment for applications requiring high overloadability.

This manual applies to line-side converter modules and generator-side converter modules in product series ACS800-67LC, ACS800-77LC, ACS800-87LC and ACS800N-87LC.

The ACS800 Hardware Manual provides comprehensive information on the ACS800-107 Cabinet-built Inverter Units, detailing specifications from 1.5 to ...

As the normal leakage current of the drive is higher than 3.5 mA AC or 10 mA DC (stated by EN 50178, 5.2.11.1), a fixed protective earth connection is required.

The ACS800 is an adjustable frequency AC drive that achieves the ultimate in AC motor control performance. The second generation of AC drives to utilize ABB's Direct Torque Control (DTC) motor ...

The cabinet can be moved into its final position with an iron bar and a wooden piece at the bottom edge of the cabinet. Care is to be taken to properly place the wooden piece so as not to damage the ...

The ACS800 Hardware Manual provides comprehensive information on the ACS800-107 Cabinet-built Inverter Units, detailing specifications from 1.5 to 5340 kW. It includes sections on hardware ...

Inverter module hardware The ACS800-104 range of inverter modules contains components for building the inverter unit (s) of a common DC bus system drive. ...
