Why is the Yangtze River economic belt important?

The Yangtze River Economic Belt (YREB) accounts for more than 40 % of China's GDP and is one of the most important engines of China's economic development. In recent years, the Chinese government has taken the YREB as a model for leading sustainable development and has given strong support to industrial transformation and upgrading.

How many provinces are in the Yangtze River basin?

The YREB crosses nine provinces and two directly administered municipalities. It accounts for over 40% of the population, 40% of freshwater resources, and 45% of the country's economic output. Growth in the middle and upper reaches of the Yangtze River Basin (YRB) lags that of the coastal areas.

Why should China promote carbon balance in the Yangtze River economic belt?

Provides key insights for sustainable development and carbon neutrality goals in the Yangtze River Economic Belt. Promoting carbon balance in the Yangtze River Economic Belt is a crucial step in China's pursuit of carbon neutrality, with industrial structural transformation serving as a vital pathway toward this goal.

ten airports of China's Yangtze River Delta (YRD) airport group during period from 2011 to 2019, China. As the first step, the current study applied state-of-the-art evaluative methods ...

Investigating the competitiveness of civil aviation airports (CAAs) from the tempo-spatial change perspective aids in the optimization of airport layout towards balanced and coordinated ...

It accounts for over 40% of the population, 40% of freshwater resources, and 45% of the country's economic output. Growth in the middle and upper reaches of the Yangtze River Basin (YRB) lags ...

This study computes the air connectivity of 16 airports in the Yangtze River Delta (YRD) region and identifies the possible driving forces over the period of 2008-2018.

Explores the spatiotemporal evolution of trade-offs and synergies between urbanization and carbon balance in the Yangtze River Economic Belt.

Exploring the competitiveness and spatial-temporal imbalance of CAAs in the Yangtze River Economic Belt (YREB) is conducive to optimizing the airport layout and promoting the coordinated development ...
