---

The Ministry of Infrastructure and Energy of Albania received four applications for solar power projects with a combined capacity of 235 MW. A ...

Albania generated nearly 490,000 megawatt-hours of electricity from solar power in 2024, reaching a record high as the country ramps up its investment in renewables. Photovoltaic capacity hit 449 ...

While manufacturing of solar PV and wind energy technology is concentrated in a limited number of countries, solar thermal technology manufacturing has gained momentum in Albania, with several ...

Five utility-scale solar photovoltaic parks with a combined installed capacity of 156 MW were commissioned in Albania in 2025. The largest of these, Sunny Side Solar (100 MW), was ...

Image by: Voltalia. Karavasta Solar delivered its first GWh of energy in December 2023. Half of Karavasta's yearly output is contracted to Albania's electricity distribution system operator, ...

On May 6, 2025, the Albanian government approved the development of two new solar power plants, totaling 54 megawatts (MW) in capacity.

Albania has achieved a significant milestone in its renewable energy transition, successfully generating 10% of its total electricity from solar power in ...

This paper studies the current state of PV usage in Albania's energy sector and the opportunities and challenges coming together with this technology. Economic, social, and ...
