Our test solutions are designed to test battery cells, modules, packs and battery management systems for e-mobility, mobile, industrial, and stationary use.

Our test solutions are designed to test battery cells, modules, packs and battery management systems for e-mobility, mobile, industrial, and stationary use.

The Battery Cell Capacity Grading Cabinet is a specialized system for grading battery cells based on their capacity, voltage, and other performance parameters. Designed for precise measurement and ...

Battery cabinet that includes Lithium-ion batteries, Battery Management System (BMS), switchgear, power supply, and communication interface.

The battery test systems CT3002N and CT3002D provide solutions for battery module/battery pack tests with higher current/voltage. They can also be used in situations where batteries are ...

The battery test systems CT3002N and CT3002D provide solutions for battery module/battery pack tests with higher current/voltage. They can also be used in ...

Made for performance testing, Arbin's module/pack battery test equipment allows engineers and scientists to assess battery behavior under specific real-world conditions.

The HBMU100-16 is installed in the battery box, mainly responsible for real-time sampling of battery voltage and temperature, comprehensively obtaining the max./min voltage and temperature of the ...
