We explore lithium-sulfur, polymer, and sodium-ion materials to create innovative energy storage solutions. By combining material design with rigorous device testing, we assess performance from ...

The laboratory combines the expertise of HU, HZB, and BAM with the aim of establishing Berlin as a location for research into sodium-ion batteries ...

Colibri Energy - Lithium Batteries produces battery solutions for GSE & Logistics to reduce costs of operations and provide sustainable alternatives.

Berlin's lithium battery storage solutions offer more than energy backup - they're strategic assets enabling cost control, sustainability compliance, and energy resilience.

Germany is building Europe's largest battery storage project, a 1 GW/4 GWh system by LEAG and Fluence in Jänschwalde.

We are designing our crystal sulfur battery to position Europe as a leader in sustainable energy storage. There is still a way to go but our technology shall enable CO₂-neutral electric flights, ...

We are designing our crystal sulfur battery to position Europe as a leader in sustainable energy storage. There is still a way to go but our ...

Storage technologies are essential for the energy and mobility transition - which is why the State of Berlin is giving high priority to building a strong economic ecosystem for battery technologies.
