Are energy storage contracts a viable option in Texas?

These contracts are particularly prevalent in Texas, which is an energy-only market (i.e., there is not a separate market for the sale of capacity). As a result, many energy storage resources will enter into hedges that will provide them with some fixed revenue streams to facilitate a project financing.

How much energy storage was deployed in 2024?

Approximately 11.9 gigawatts (GW) of storage was deployed in 2024. In only the third quarter of 2024, and despite mounting concerns over potential trade and policy developments, the US storage market added a record-setting 3.8 GW of energy storage--an 80% increase compared to the prior year.

Are battery energy storage prices going back to reliable supply?

This insight comes to you at the turning of the tide: after a period of increased pricing and supply chain disruptions, we are starting to see a return to reliable supply and declining prices in the battery energy storage markets. From the perspective of the industry, the relief could not come soon enough.

Does US install more energy storage in Q4 2023?

U.S. Storage Energy Monitor Q4 2023 Executive Summary, Wood Mackenzie Power & Renewables/American Clean Power Association (Dec. 2023); US Installs More Energy Storage Than Ever Before in Q3, Solar Power World (Dec. 13, 2023). See supra n.3.
