The Department of Energy's (DOE) Loan Programs Office (LPO) is working to support deployment of virtual power plants (VPPs) in the United States to make ...

In the day-ahead stage, the microgrid operator must determine the optimal capacity procurement of VES (e.g., through demand response) for smart operation. For this purpose, this ...

Our fourth-generation products--including the eco-friendly CESS series--have undergone continuous iteration, perfectly adapting to diverse scenarios such as peak shaving, virtual power plants, backup ...

Essentially collections of distributed battery storage units and other controllable devices, VPPs also can be built quickly and cost effectively--key attributes today given the recent uptick in ...

The empirical results indicate that incorporating mobile energy storage into virtual power plant dispatch operations leads to reductions in operational costs for the local energy community, ...

Essentially collections of distributed battery storage units and other controllable devices, VPPs also can be built quickly and cost effectively--key ...

The Department of Energy's (DOE) Loan Programs Office (LPO) is working to support deployment of virtual power plants (VPPs) in the United States to make the U.S. grid more flexible, affordable, ...

NYSERDA is providing incentives that can help accelerate deployment of bulk energy storage projects that provide wholesale market energy, ancillary services, and/or capacity services.
