What makes a good battery charging cabinet?

A good battery charging cabinet doubles as a charging station. It must include: Factory-installed socket strips. This minimizes the need for retrofitting and ensures safety from the outset. Ensure your cabinet has been independently tested for both internal and external fire resistance. Look for models offering:

Are battery charging cabinets fire rated?

Most traditional cabinets are fire-rated only for external fire resistance. Lithium-ion battery incidents often originate internally, requiring fireproof battery charging cabinets that can withstand internal fires for at least 90 minutes. Cabinets should be tested and certified to standards like SS-EN-1363-1 for internal fire resistance.
