CAIRO - 24 December 2024: The European Bank for Reconstruction and Development (EBRD) has announced a \$275 million joint financing package to support the development of Africa's ...

We construct, own and operate large-scale battery storage projects today that will transition us to the grid of tomorrow, with a growing portfolio of over 9,000 MW of battery storage projects in various ...

The city's ambitious plan to derive 42% of its electricity from renewables by 2030 faces a critical challenge: intermittent power supply. Solar panels sit idle at night while wind turbines stall ...

As a global clean energy pioneer, Masdar is advancing the development and deployment of solar, wind, geothermal, battery storage and green hydrogen technologies to accelerate the ...

The project aims at providing the scientific, technological and policy basis required for the development and implementation of large-scale energy storage in Egypt, enabling increased penetration of ...

With a deadline approaching in Q4 2024, this project aims to deploy 500 MW of grid-scale battery storage, complementing the nation's \$40 billion renewable energy expansion plan.

The project, located approximately 300 kilometers southeast of Cairo, is one of the largest wind power projects undertaken by POWERCHINA in the Middle East and North Africa.

The signing of the PPA will be followed by wind measurements on the site, to be finalised in the first half of 2026, before the project is further advanced towards financial close and...
