Cape Verde is moving toward a cleaner energy future by expanding its wind capacity by 13.5 megawatts and adding 26 megawatt-hours of grid-connected battery storage.

The project, considered the world's largest solar-storage project, will install 3.5GW of solar photovoltaic capacity and a 4.5GWh battery storage system. The project has commenced in November 2024. [pdf]

“Think of it as building a high-tech sandwich - layer by layer, we create energy-dense battery cells ready for Cape Verde's salty coastal air and tropical temperatures.”

Cape Verde can meet its goal of 50% renewables today by integrating energy storage. A 100% Renewable System is achieved from 2026, with a 20 year cost from 68 to 107 MEUR.

With the help of AI, manufacturers optimize systems, extend battery lifespan, and enhance grid flexibility and security, accelerating the steady Cape Verde has inaugurated its largest solar PV plant to date, ...

Specializing in battery energy storage systems (BESS) within shipping container frameworks, this facility represents Africa's first vertically integrated manufacturing hub for modular renewable energy solutions.

This guide provides step-by-step instructions on how to install your R-BOX-OC outdoor solar battery cabinet, including site selection, assembly, wiring, and system testing. [pdf]

These high-tech systems act like a “power bank” for entire communities, storing excess energy during sunny days and releasing it when clouds roll in. “Cape Verde aims to generate 50% of its electricity ...
