GSU has started building a 50-megawatt solar photovoltaic plant in Saka&#239;, Central African Republic. The project aims to expand electricity access and strengthen the country's ...

By 2030, the country aims to increase the overall electricity access rate to 50% using diversified power generation sources. Projects have included the Danzi solar plant as well as off-grid ...

New Global Solar Council report shows solar deployment spreading across more African countries, increasingly driven by distributed systems and rising demand for reliability -- ...

With an impressive capacity of 25 megawatts and sprawled over an area of 70 hectares, the solar facility houses nearly 47,000 solar panels. This development, part of the Emergency ...

Abu Dhabi, UAE - August 18, 2025 - UAE-based Global South Utilities (GSU), a Resources Investment Company, has officially broken ground on a 50-megawatt solar photovoltaic (PV) ...

The Central African Republic has emerged as the continental leader, producing more than one-third of its energy from solar power--the highest solar penetration rate in Africa's ...

UAE-based Global South Utilities has begun construction on a 50 MW solar project with 10 MWh of battery energy storage systems (BESS) in the Central African Republic.

By 2030, the country aims to increase the overall electricity access rate to 50% using diversified power generation sources. Projects have included the Danzi solar plant as well as off-grid options for ...
