-----

Chile Energy Minister Diego Pardow was present at the inauguration of the 200 MW/800 MWh BESS del Desierto, a project its developers describe as the first large-scale ...

Chile's first battery energy storage projects were commissioned in 2009, and all but two of its 16 administrative ...

Battery storage and flexible gas generation are expected to play a crucial role in facilitating the transition. The importance of having enough energy storage capacity is clear from the rising ...

Fortunately, the missing link is no mystery; energy generated must be stored, and Battery Energy Storage Systems (BESS) is the technology poised to bridge the gap. Chile's ...

Chile Energy Minister Diego Pardow was present at the inauguration of the 200 MW/800 MWh BESS del Desierto, a project its developers describe as the first large-scale standalone energy ...

Battery storage and flexible gas generation are expected to play a crucial role in facilitating the transition. The importance of having enough energy storage capacity is clear from the rising amounts of ...

With transmission lines at overcapacity and permitting delays ...

To address these issues, two major developments are planned -- the large-scale deployment of battery storage and the construction of the 3 GW Kimal-Lo Aguirre ...
