---

With 23 energy storage projects already approved, totaling an impressive 3,000 MW of capacity, Chile is at the forefront of innovation and efficiency in Latin ...

Chile will need new renewable energy storage systems to replace its current backup capacity of coal-fired plants and natural gas-powered combined cycle turbines and improve the ...

By enabling the storage of solar energy for up to five hours, Andes Solar II-B provides firm power even after sunset, effectively addressing one of the key challenges of solar energy integration.

In March, Elena, Antofagasta Region, Generadora Metropolitana --owned by AME and EDF power solutions Chile-- officially began construction of Dune Plus, one of the largest energy ...

The energy generated and stored at Dune Plus will support a 15-year, 1,000 GWh power supply contract with Codelco, the world's largest copper producer and Chile's state-owned mining ...

The project, a major part of the Oasis de Atacama platform, combines 77 MW of operational solar PV with a 430 MW/3.5 GWh battery energy storage system (BESS) in Chile's ...

Located on the site of the former Tocopilla coal-fired power plant, the project represents Engie's first large-scale standalone battery storage facility in Chile.

Located on the same site as the Sierra Gorda Este wind farm and the Las Salinas photovoltaic plant, this new battery energy storage system (BESS) will have a capacity of 205 MW ...
