How many energy storage projects are in Chile?

Currently, 36 of the 129 large-scale projects Latin America projects with an energy storage component under development are in Chile, including 32 out of 71 of the region's early works projects. The storage technologies either in use or being considered include:

Are battery energy storage systems a viable alternative for Chilean power producers?

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable alternative for Chilean power producers.

Where are Chile's battery energy storage facilities located?

Chile's first battery energy storage projects were commissioned in 2009, and all but two of its 16 administrative regions have facilities in operation, under construction or in the planning stage. The greatest installed capacity is found in the northern regions of Antofagasta and Tarapacá, the country's solar powerhouses.

How much battery storage capacity does Chile have?

According to data from Acera, the Chilean Renewable Energy Association, there are only 64 MW of battery storage capacity currently active, representing 0.2% of national capacity. AES Andes, a subsidiary of U.S. company AES Corp. operates all 64 MW at their Angamos and Los Andes substations.

By the end of March 2025, the country had 954 MW of operational energy storage capacity, representing 48% of its national target of 2 GW by 2030. This progress highlights Chile's ...

In March 2024, Atlas Renewable Energy marked its entry into the standalone battery storage market through a 15-year PPA with Chilean energy trader ...

In northern Chile, the Group is building three battery storage systems to support Coya, Tamaya, and Capricornio solar power plants, ...

The central and northern regions of Chile will be the engine of this growth, with plans for 3,000 MW and 6,000 MW of energy storage capacity, respectively. These regions are ideal for solar ...

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage ...
