Why is Chinese solar power gaining traction in Africa?

Chinese solar equipment has been flooding African markets, partly as a ripple effect of the US-China trade war. It's one of several factors helping the continent gain traction with electrification. Solar power is widely recognized as an excellent solution for Africa.

Is China really bullish about solar in Africa?

Over just 12 months, China shipped solar panels with an overall capacity of 15 GW to the continent. "Everybody seems to be very bullish about solar in Africa," John van Zuylen, CEO of the Africa Solar Industry Association (AFSIA), a pan-African lobby group, told DW.

Why does Africa need solar power?

It's one of several factors helping the continent gain traction with electrification. Solar power is widely recognized as an excellent solution for Africa. Sunlight is abundant, economies crave reliable power sources, and the technology is becoming massively cheap.

Prices of lithium in China are close to a record high as a power crisis in the nation's major hub for the vital electric-vehicle battery ingredient threatens an already-tight market.
