This heavy-duty enclosure securely houses a Stand By Power Supply and three (3) batteries along with equipment and cable required for fiber optic conversion and/or distribution.

Lithium-ion batteries also provide higher power density and efficiency, especially under heavy discharge rates. This means that no battery over-sizing is needed.

It is clear from this installation example that by providing higher density power to the cabinet and more specifically 3-Phase power that the number of drops run to the cabinet is greatly reduced resulting in ...

Single-phase systems are ideal for smaller IT setups, offering reliable power for sensitive equipment. For larger environments, 3-phase systems deliver higher capacity and centralized control.
