What is the community microgrid initiative?

The Community Microgrid Initiative is designed to achieve Community Microgrid demonstration projects that prove that local renewables connected to the distribution grid can provide at least 25% of the total electric energy consumed while maintaining grid reliability and power quality.

Are there any Community Microgrids in California?

While deploying a true Community Microgrid requires utility cooperation, standalone microgrids are becoming more common around California and the US. In addition to the Clean Coalition's projects detailed here, we have compiled a list of some of the microgrids around the country, including in California.

Does a community microgrid need utility cooperation?

Deploying a true Community Microgrid requires utility cooperation, which has been slow to come. The Redwood Coast Airport Microgrid (RCAM), being staged in Northern California in partnership with Pacific Gas & Electric (PG&E), provides an example of the what can be done with utility cooperation.
