Can PG&E power data centers?

PG&E agrees. Spokesperson Stephanie Magallon told CalMatters in an email that nuclear power, carbon-capture systems and large solar-plus-battery projects are all options under consideration for powering data centers in its region.

Does a battery energy storage system qualify for performance compliance credit?

Performance compliance credit is also available for all building types. To qualify, the battery energy storage system shall be certified to the Energy Commission according to Joint Appendix JA12. Please visit the Solar Equipment List webpage for certification instructions, as well as the list of currently certified systems.

Are back-up generators a problem in Santa Clara County?

While back-up generators run only intermittently, their presence is concentrated in a handful of regions. In Santa Clara County, where many facilities sit close together in dense industrial areas, the local impacts could be greater simply because so much equipment is packed into a small space.

Should data center costs be kept off household bills?

One law in Oregon will require data-center grid costs to remain off household bills. A Minnesota law will give very large data centers their own billing category so regulators can keep their costs separate from other customers' electric bills.

As California pushes toward 100% clean electricity by 2045, San Jose has emerged as a testing ground for next-gen energy storage solutions. The city's Energy Storage System Standards aren't just red ...

Artificial intelligence and its growing demand for data centers are putting new pressure on California's electric grid. In San Jose, supporters see jobs and investment, while a key ratepayer ...

Summary: Discover how San Jose's energy storage equipment box manufacturers are driving innovation in renewable energy systems. Explore industry trends, technical breakthroughs, and real-world ...

An agreement with Noosa Energy Storage LLC, a subsidiary of Broad Reach Power, to buy Resource Adequacy associated with a battery storage facility, in an amount not to exceed \$2,600,000 annually ...

GENS of ESRB has conducted a survey of energy storage systems to prepare for the addition of ESS to GO 167 in order to collect information from the existing and future planned ESS facilities that serve ...
