As a professional manufacturer in China, produces both energy storage cabinets and battery cell in-house, ensuring full quality control across the entire production process.

It is an one-stop integration system and consist of battery module, PCS, PV controler (MPPT) (optional), control system, fire control system, temperature control system and monitoring system.

Battery Energy Storage System (BESS): Pre-designed 1MW/1MWh solution allows the site to operate for one (1) hour on off-grid mode while keeping necessary and critical loads powered up.

Our containerised energy storage system (BESS) is the perfect solution for large-scale energy storage projects. The energy storage containers can be used in the integration of various storage ...

Featuring a split PCS and battery cabinet design, it offers 1+N scalability and integrates seamlessly with solar PV, diesel generators, the grid, and utility power.

Versatile energy storage for commercial and industrial applications. The demand for power, and variation in the demand, continues to increase due to end-user loads and electrification, including the ...

They transform solar-sourced DC into AC and store unused energy in high-performance battery packs, providing clean, renewable backup energy to mission-critical telecom equipment.

The High-Voltage Rack-Mounted Energy Storage System is a modular indoor solution designed for industrial and commercial applications requiring high power stability. It integrates LFP battery ...
