Let's face it - when you think of cutting-edge energy tech, Romania might not be the first country that springs to mind. But here's the kicker: Bucharest is quietly becoming Europe's testing ...

Bucharest's completed energy storage tender marks a turning point for Eastern Europe's renewable energy landscape. This grid-scale battery project, now moving from planning to implementation ...

Bucharest's completed energy storage tender marks a turning point for Eastern Europe's renewable energy landscape. This grid-scale battery project, now moving from planning to ...

In April, Romania's largest battery storage system, of 24 MWh, was put into operation. It is the first phase of a project totaling 216 MWh. The facility is connected to the ...

Bucharest has become a focal point for renewable energy development in Eastern Europe. With Romania aiming to achieve 30% renewable energy integration by 2030, energy storage ...

Under the project, CNAB will develop a photovoltaic power plant with a total planned capacity of 31.5 megawatt-peak (MWp), complemented by an energy storage system ...

But here's the kicker: 68% of Romania's power still comes from aging fossil fuel plants. With grid reliability becoming sort of a guessing game during peak summers, photovoltaic energy storage isn't ...

Let's face it - when you think of cutting-edge energy tech, Romania might not be the first country that springs to mind. But here's the kicker: Bucharest is quietly becoming Europe's testing ground for ...
