Can I ship lithium batteries by mail?

Persons wishing to ship lithium batteries and electronic devices containing lithium batteries by mail should be aware that certain requirements must be met to ensure safety during transport.

How should batteries be packaged?

Batteries and electronic devices containing batteries should be securely packed to prevent movement within the outer packaging, or activation of the device. 4. Do not package batteries loosely or with metal objects, such as tools. 5. Place batteries and electronic devices containing batteries in a rigid, strong outer packaging. 6.

Why do lithium batteries need to be packaged?

Lithium cells or batteries, including lithium cells or batteries packed with, or contained in, equipment, must be packaged in a manner to prevent short circuits, movement within the outer package and accidental activation of the equipment.

How many batteries can be mailed in a package?

No limit on number of cells or batteries per package. The lithium cells and batteries must be mailed in the "originally sealed packaging" and placed in strong, rigid outer packaging capable of passing a 1.2 meter drop test.

Lithium Batteries: The regulations are transitioning to a new Lithium Battery marks, which will become mandatory on January 1, 2019 and is currently authorized for use.

Shippers are required to understand and comply with the applicable regulations for the transport of batteries by all modes of transportation.

This type of system does not require batteries, but instead uses a capacitor to store energy. When the power goes out, the capacitor is discharged and provides power to the connected ...
