When will the Energy Storage Summit Central Eastern Europe return?

Thank you for joining us for the 3rd Edition of the Energy Storage Summit Central Eastern Europe The Summit will return for 2026! Baker McKenzie delivers integrated solutions to complex challenges. Complex business challenges require an integrated response across different markets, sectors and areas of law.

How many residential energy storage systems are there in Germany?

By September 2023, Germany has installed more than 1 million residential energy storage systems and expects to add more than 400,000 units per year in the future. Volatile energy prices and the popularity of photovoltaic self-use have driven demand for residential energy storage, which is expected to continue to grow through 2030.

Are grid-side energy storage projects a good idea in Belgium?

Grid-side energy storage projects in Belgium have good prospects, thanks to low grid charges, no double charging policies, and diversified revenue sources. In 2023, 11 new battery projects in Belgium have been awarded capacity market contracts, totaling more than 363 MW.

What is the future of energy storage in Norway?

Norway's poor lighting conditions, residential PV and energy storage development are limited, the future market may mainly focus on the outlying island microgrid. Spain will install 242 MW of energy storage in 2023 and is expected to increase to 5.8 GW by 2030.
