What is the European Cluster collaboration platform (ECCP)?

The European Cluster Collaboration Platform (ECCP) aims to better connect clusters and ecosystems across the EU to facilitate the strengthening and creation of EU value chains, use clusters as investment hotspots and implement the green and digital transition of the industrial ecosystems.

How can Solarpower support the inverter manufacturing industry in Europe?

The company will focus on manufacturing microinverters in the US, with two existing contract manufacturing partners in South Carolina and Texas. SolarPower Europe suggested five measures to support the inverter manufacturing industry in Europe. Firstly, the right conditions for inverter manufacturers in Europe must be ensured.

How big is Europe's inverter industry?

In its Inverters 2.0: Strengthening Europe's inverter industry report, SolarPower Europe said Europe's inverter manufacturing capacity grew from 72GW in 2022 to 82GW in 2023, representing a 14% growth.

Are European inverter manufacturers facing competition?

However, European inverter manufacturers are facing pressure and growing competition. While some EU inverter companies keep growing and announcing reinvestment plans, their relative market share in Europe is shrinking. It is estimated that EU inverter manufacturers are only able to capture 20% of the market currently.

The European Cluster Collaboration Platform (ECCP) aims to better connect clusters and ecosystems across the EU to facilitate the strengthening ...

The initiative aims to ensure that European inverter manufacturers can leverage technological advancements essential for the electrification and digitalization of the energy system. By ...

BRUSSELS, Belgium (Tuesday 26 November 2024): On behalf of the SolarPower Europe Board, the Secretariat has issued the following joint statement. This follows reports of ...

Proposals are expected to: Evaluate system integration and cybersecurity, while providing guidance for future developments (e.g. recyclability) in both hardware and software. This ...

Boosting domestic manufacturing capacity will be key for the EU to reach the REPowerEU objectives of over 320 GW of newly installed solar photovoltaic capacity by 2025, and almost 600 GW by 2030.
