Why is Tampere launching a battery system factory?

The green transition demands industrial electrification, and Tampere provides a favorable environment for this development. Since 2014, Celltech Solutions Oy has been making preparations to launch a battery systems factory by hiring experts, ensuring supply chains, and crafting battery systems that suit the specific needs of industrial vehicles.

What's happening at Celltech's new Tampere factory?

The new Tampere factory is part of Celltech's growth plan. "Through ongoing recruitment, we will employ more than 50 people at the Tampere factory this year and next", says Kim Nikitin, CEO of Celltech Solutions Oy. Celltech Solutions Oy is accelerating industrial electrification with its durable and sturdy battery platforms.

Why should you invest in a battery industry in Finland?

Finland has essential minerals which are needed in battery production. In addition to these, Finland also has a lot of renewable electricity and the skills and knowledge needed by the industry. The battery industry investment potential in Finland is vast. The companies have plans to make investments worth 6-9 billion euros in the next 5 years.

Huijue Group's industrial and commercial energy storage system adopts an integrated design concept, integrating batteries in the cabinet, battery management system BMS, energy ...

The factory was inaugurated on October 4, 2022, and the production series will commence in early 2023. The green transition demands industrial electrification, and Tampere ...

The battery energy storage facility will support the balancing of production and consumption in the main grid by participating in Fingrid's reserve market and help to balance Taaleri Energia's own wind ...

Next-generation battery management systems maintain optimal operating conditions with 45% less energy consumption, extending battery lifespan to 20+ years. Standardized plug-and-play ...

Huijue Group's industrial and commercial energy storage system adopts an integrated design concept, integrating batteries in the cabinet, battery management system BMS, energy management system ...

Next-generation battery management systems maintain optimal operating conditions with 45% less energy consumption, extending battery lifespan to 20+ years. Standardized plug-and-play designs ...

The new factory will focus on battery systems for industrial vehicles and include an Engineering & Development Centre (EDC) serving all units of Celltech. The project will create jobs ...

Merus Power and Taaleri Energia's 30MW/36MWh project near Tampere isn't just another battery farm. Wait, no - it's actually Finland's first large-scale system providing primary frequency ...
