The newly signed South Asia Energy Storage Power Station Project aims to flip the script by deploying cutting-edge battery storage systems. But why should industries care?

Spanning Australia, Japan, Southeast Asia and South Asia, these deployments represent a substantial contribution to 16 GWh of new Battery Energy Storage System (BESS) ...

In the Philippines, momentum is building. The Department of Energy's fourth Green Energy Auction (GEA-4) is the first to integrate energy storage with new solar capacity, which ...

The EPC project will cover the design, procurement, construction, commissioning and other links of photovoltaic power stations and electrochemical energy storage power ...

In an article featured on The Business Times, Rodrigo Hernandezvara, Head of Solar C& I at ENGIE highlights how Battery Energy Storage Systems (BESS), combined with renewable energy sources ...

The EPC project will cover the design, procurement, construction, commissioning and other links of photovoltaic power stations and ...

The EPC project will cover the design, procurement, construction, commissioning and other links of photovoltaic power stations and electrochemical energy storage power stations, and is ...

Building fully integrated regional grids, long-distance transmission lines and grid-scale storage technologies is imperative for Southeast Asia so that countries can start capitalising on their ...
