What if a community solar project produced 600 kWh in one month?

Imagine your share of a community solar project produces 600 kWh of energy in one month. On the next utility bill, you would receive credit for the 600 kWh of electricity. If your total consumption was 800 kWh that month, you would only need to pay the utility company for the remaining 200 kWh of electricity. a more diverse energy supply.

How many solar panels do I Need?

The number of solar panels you'll need to meet the energy demands of your home depends on your home's location and roof size. Please set up an in-home consultation with Home Depot's local solar panel installer to discuss how many solar panels you will need. How much energy will my solar panels produce?

Are solar power systems right for You?

Solar power systems are leading the global movement toward clean, renewable energy. If you own your home and think you are paying too much for electricity, then solar power may be the right clean energy option for you. When you go solar, you get more control of your monthly electricity costs.

Who are the subscribers of a community solar project?

The subscribers are the individuals, businesses, nonprofits, or local governments, that purchase a share of the electricity generated by the community solar project. A community solar project is not located at the house or business where the subscribers use electricity.
