What is the GE reservoir storage unit?

The 1.2 MW,4 MWh Reservoir Storage Unit,is the fundamental building block of GE's Reservoir platform. It is a modular solution that integrates GE's Battery Blade design (module stack design) with key technologies from across the company's portfolio to achieve an industry-leading energy density,footprint and lifetime performance.

What is GE reservoir platform?

GE's Reservoir Platform...Cleaner,more reliable power where and when it's needed most. GE's Reservoir platform,developed with innovative technology from GE's Global Research Center,is a flexible,compact energy storage solution for AC or DC coupled systems.

Why should you choose GE Energy Storage?

GE is globally recognized for designing and delivering customized energy storage solutions for diverse applications. With regionally located technical experts,our teams work directly with customers during the lifetime of the project. To date GE has more than 207 MWh of energy storage in operation or in construction globally.

How many MWh of energy storage does GE have?

To date GE has more than 207 MWhof energy storage in operation or in construction globally. This project will relieve pressure on the host country's energy system and provide flexibility when it is most needed to deliver a more balanced,secure energy system and help reduce consumer energy cost.

Technology costs for battery storage continue to drop quickly, largely owing to the rapid scale-up of battery manufacturing for electric vehicles, stimulating deployment in the power sector.

GE's broad portfolio of Reservoir Solutions can be tailored to your operational needs, enabling efficient, cost-effective storage distribution and utilization of energy where and when it's needed most.
