Are generator protection components included in the same cabinet?

When generator control systems are designed, generator protection components are often included in the same cabinet for small to medium facility operations. The generator protection devices and wiring are separate from the control circuit devices and wiring.

What is a generator termination cabinet (GTC)?

Whether it is long or short term utility outage, facility maintenance, or whatever the needs are; AMP's GTC will keep you up and running. Our generator termination cabinets (GTC) are designed to safely connect and disconnect a portable generator to a building or portable piece of equipment.

What are custom electrical cabinets?

Engineered for efficiency, our custom electrical cabinets feature high-quality disconnects, transfer switches, circuit breakers, and other essential components, delivering unmatched reliability and performance.

What are the electrical ratings for a kitchen cabinet?

Ratings are 400 - 3000A, 600 volt, 3 phase 4 wire, 3 phase 3 wire and 1 phase 3 wire, NEMA 1/3R dual rated and I_{sc} ratings of 85KA RMS symmetrical with no cable lashing required. (Please contact factory for higher ratings) Cabinets are either wall mount or free standing and suitable for indoor or outdoor applications.
