What is Georgia Power's simple solar program?

Georgia Power's Simple Solar program allows all customers to support and foster the growth of solar energy by enabling Georgia Power to purchase and retire Renewable Energy Credits (REC) generated from solar energy resources.

What is GA Solar?

GA Solar is a group comprised of leading experts in solar manufacturing and installation, academia, finance, and the law. They are leading the effort in Georgia to promote the economic and environmental benefits of solar energy through education, advocacy, and industry support. Join their campaign to urge the Public Service Commission to Scrap the Solar Cap!

How much does a solar system cost in Georgia?

The Residential Clean Energy Credit, formerly known as the federal investment tax credit (ITC), can reduce your solar panel system's cost by 30%. Your entire system, including all the equipment, labor, permitting, and sales tax, qualifies for the ITC. In Georgia, the average cost for a 5 kW solar panel system is around \$13,160.

Do solar batteries make good financial sense in Georgia?

Batteries can make good financial sense as part of a home solar system in Georgia. The state's net billing policy incentivizes solar owners to hoard as much of their own solar power as possible, rather than sending it to the grid.

How can we help? We are here to connect you to information and answer questions about Georgia state government.

The Kemp Family is truly honored to serve Georgia. In the years to come, we will advance initiatives that spur job growth in all parts of our state, lower tax
