What is an emergency solar generator?

Emergency solar generators are portable power systems that use solar energy to charge a built-in battery, which then supplies electricity to your devices. They're a clean, quiet, and fuel-free alternative to gas generators. A typical setup includes solar panels, a battery, and an inverter to convert stored energy into usable power.

Are emergency solar generators good?

The Jackery 3000 PRO and EF ECOFLOW RIVER 2 Max are highly recommended for home backup, offering large capacities and fast charging. They can power essential appliances during power outages, making them ideal for emergencies. How long do emergency solar generators last?

What is the best emergency solar power kit?

The Jackery Explorer 1000's versatility, design and overall value make it our staff's pick for the best overall emergency solar power kit. It has the power to effortlessly keep you juiced during everything from camping and fishing trips to SHTF situations and household emergencies. For most scenarios, it checks all the key boxes including:

How much power does an emergency solar power kit use?

If you need emergency power for an entire house or to support power-hungry appliances like air conditioners, you're better off with a 2000-3000W rating. The battery capacity, measured in watt hours (Wh), tells you how much energy an emergency solar power kit can store.
