How do you mount a battery holder?

Loosely screw the M8 (1/2") nuts onto each back holder and base studs to hold the back holder in place. Fully tighten at 17Nm/150 in-lb to finally secure the back holder. Hold the wall mount with the front facing you and position the mount on the securing studs of the back holder's battery mounting bracket.

Can the SolarEdge home battery be floor mounted?

The SolarEdge Home Battery can be floor mounted with each battery secured in a floor mount battery stand. The floor mount stand is provided as a kit that is purchased separately from the SolarEdge Home Battery. This document lists the contents of the SolarEdge Home Battery Floor Mount stand kit.

How do you install a battery stand?

Insert and loosely tighten the long M5 wall bracket securing screw in the upper wall bracket slot on each side. The long securing screw threads through the battery housing and acts as a safety suspension pin. Recheck that the stand is level and, if necessary, fine-tune the height of the legs until the stand is level.

How do you install a battery on a SolarEdge inverter?

Open the wiring gutter on the left side of the floor mount base and lay the wires in place. Pass the cables through the wiring sleeve on the top left side of the floor mount base and connect to the battery. If installing more than one battery per inverter, use branch connectors. See the SolarEdge Home Battery Quick Installation Guide.

If batteries are to be strapped down, use the oblong holes at the ends of the shelves to go between the top side and the bottom side of the shelf. The straps, (not supplied) need to be fed under the bottom ...
