How much does a water cooler cost?

A typical price for a Water Cooler is \$240but can range from approximately \$12 to \$599. What are the most popular color/finish families of Water Coolers? Black,Stainless steel and White are among the most popular colors of Water Coolers.

How do I ask for water cooler prices?

When asking for our water cooler prices,mention how many employees you need to keep hydratedand we can assist with supplying the right number of spring water bottles. Plumbed water coolers and drinking fountains offer customers a great long term hydration solution at a fixed cost.

How much energy does a water cooler use?

The average water cooler operates at 100 watts,contributing to energy usage primarily during its cooling cycles. Running a water cooler for longer periods,especially in hot weather,can significantly increase energy costs. Adjusting the thermostat settings can impact the wattage used per hour; lower settings tend to use less power.

Opting for an energy-smart water cooler can lighten your monthly electricity bill. Scout for models with that cool Energy Star thumbs-up, ensuring they sip, rather than guzzle, energy.
