How much does it cost to add more solar panels?

The cost of adding extra solar panels varies based on several factors, including the number of panels, the installation's complexity, and if any other upgrades are required. Additional solar capacity typically costs between \$800 and \$1,600 per panel, though every project is different.

Should I add solar panels to my existing system?

If you add solar panels to an existing system, you can increase your solar electricity generation, extend the life of your installation, and create further savings on utility energy costs.

Do you need a professional to replace solar panels?

Solar panel replacement should always be performed by a professional, and safe disposal of the equipment is essential, as over 85% of a PV module can be recycled. In this guide, learn how to add solar panels to an existing system, the benefits of expanding your array, and when the cost of adding solar panels is worth it.

Are extra solar panels worth it?

Today, the cost of adding extra solar panels may be worth it for increased solar savings after: Replacing gas-powered appliances with electric alternatives for water heating, air conditioning, cooking, and other home systems. Purchasing or leasing an electric vehicle (EV) and charging your EV with solar for the lowest possible ongoing energy costs.

Meet the photovoltaic energy storage cabinet - the unsung hero making solar power work through Netflix binge nights and cloudy days. Let's cut through the industry jargon ...
