How much does a solar battery cost?

A fully-installed 13.5 kWh solar battery costs \$13,500 on average, after claiming the 30% tax credit. This price can vary from project to project as there are many factors that influence battery storage costs. Update: The homeowner-claimed tax credit for home battery storage is only available until the end of 2025.

How much does a solar system cost?

The downside is interest payments on the loan accrue over time to increase the overall cost of the system. For example, using the example from earlier, financing a 7.9 kW solar system and 12.5 kWh battery with a 20-year loan (with zero money down) would cost nearly \$47,000 while paying cash would cost around \$30,000.

Do incentives affect the cost of a solar battery system?

Incentives also have a significant impact on the cost of a solar battery system. The 30% tax credit for purchasing battery storage (with cash or loan) ends on December 31, 2025. However, there is a federal tax credit available through the end of 2027 for leasing battery storage through a third-party owner.

Are solar batteries worth it?

The benefits of solar batteries aren't purely financial. Many homeowners value the peace of mind that comes with backup power. Without a battery, grid-tied solar panels automatically shut down during blackouts for safety reasons. This leaves you without power even though you have solar panels on your roof.

But how much does home battery storage cost? In this article, we'll explore solar battery prices and six factors that influence the cost of installing a ...
