What is Solax C&I energy storage system?

SolaX C&I Energy Storage System is a high-efficiency solution for commercial and industrial use, offering both liquid and air cooling for optimal performance. With LFP battery technology, advanced EMS and PCS, it enables real-time monitoring, smart schedule, and seamless integration with solar PV, EV charging, and backup power.

What is Solax C&I ESS?

Equipped with high-performance LFP batteries, SolaX C&I ESS offers an extended cycle life and stable performance. The intelligent liquid cooling thermal management technology effectively regulates battery temperature, enhancing system efficiency and lifespan.

What is smart energy storage?

Standardized Smart Energy Storage with Zero Capacity Loss All-In-One integrated design, 1.76m<sup>2</sup> footprint, saving more than 30% of floor space compared to split type Low-voltage connection for AC-side cabinet integration, ensuring zero energy loss Four-in-one Safety Design: "Predict, Prevent, Resist and Improve"

How do energy storage systems reduce electricity bill?

Charge the battery at off-peak tariff and use it at peak tariff to reduce the electricity bill. The battery will discharge to offset portions of the load consumption beyond the power demand threshold to reduce the electricity bill. The energy storage system as a backup power will supply power to the load when the power grid fails.
