Ireland's energy storage could increase eightfold by 2035, according to a new report by Energy Storage Ireland. It states that battery storage has the potential to provide secure,...

Leading renewable energy operator and developer SSE Renewables is taking its first steps into solar energy generation and associated battery ...

Wood MacKenzie predicts that Ireland will meet its 8 GW 2030 solar target but wind, heat pumps, and electric vehicles (EVs) are all lagging behind theirs.

Every battery storage project connected makes our electricity grid more secure and helps to integrate wind and solar power. Today, in May 2022, we have 13 projects operating with a ...

New and emerging long duration storage technologies will play a critical role in delivering an affordable, fully decarbonised power system to the people of Ireland.

Battery power has the potential to provide secure, affordable, clean power to thousands of homes when the sun isn't shining and the wind isn't blowing, according to a report by Energy ...

Last September, Statkraft announced that it planned to build and co-locate Ireland's first four-hour grid-scale battery energy storage system (BESS) ...

New and emerging long duration storage technologies will play a critical role in delivering an affordable, fully decarbonised power system to the ...
