There are two main types of solar energy technologies--photovoltaics (PV) and concentrating solar-thermal power (CSP). On this page you'll find resources to learn what solar ...

Solar technologies convert sunlight into electrical energy either through photovoltaic (PV) panels or through mirrors that concentrate solar radiation. This energy can be used to generate electricity or be ...

Solar energy storage can be broken into three general categories: battery, thermal, and mechanical. Let's take a quick look at each. What is battery storage? Batteries are by far the most common way ...
