Does American Samoa need solar energy?

An isolated archipelago, American Samoa must generate all the electricity its community needs, striving for greater energy independence to ensure a more sustainable future. Positioned less than 1,000 miles south of the equator, American Samoa is uniquely positioned to harness its abundant solar energy resources.

Which land is available for solar energy in Samoa?

For power, spaces in front near and the rear end of the thermal station is available for RETotal land area e from Samoa Land Corporation is 15.5 acres land was designated for Solar Energy. LeaseProperty is legally leased to EPC from Samoa La

What is a solar project in Samoa & Tutuila?

The three projects, deployed on American Samoa islands of Tutuila and Aunu'u, will have installed capacities of 4 MW/8 MWh, 5 MW/10 MWh, and 1 MW/2 MWh. All three projects will support ramp rate control to smooth and limit fluctuations in solar photovoltaic (PV) power output, ensuring reliable renewable integration and grid stability.

What is the American Samoa resilience Commission?

Executive Order 019-2021 established the American Samoa Resilience Commission and the Governor's Resilience Office to help coordinate a holistic and comprehensive approach to future planning and development initiatives.

This expansion added 5MW of upgraded solar capacity along with 2MW of energy storage batteries, making it the first integrated solar-storage power station in Samoa and the entire South Pacific region.

The American Samoa Power Authority selected Eastern Power Solutions with the EVLO 1000 BESS to enhance the delivery of safe, reliable, and clean power to the local community.
