The guide highlights the limitations of general-purpose air conditioners in industrial environments and emphasizes the need for specialized solutions such as Cabinet Coolers.

Fully eco-design compliant, our low temperature chiller range combines environmental responsibility with features such as electronic expansion valves and variable fan speeds as standard to ensure precise ...

With a nationwide network of highly experienced technical engineers, we will visit your site to understand your application needs, audit your facilities and potential constraints, and develop the optimum ...

Kirur Habika Systems Engineering - Cold room construction, refrigerated containers, modular buildings, cooling units and professional service.

Our team can assist you in selecting the most efficient and reliable cabinet cooling solution based on your technical specifications, environmental conditions, and compliance requirements.

The new ICS Cool Energy LT Fan Coils can be used for maintaining low temperatures in large areas, keeping spaces below 5°C, which is crucial for the temporary storage of perishable ...

We provide turn-key solutions throughout North America, and are experts in designing and constructing precision controlled environments for the safe and reliable storage of temperature and/or humidity ...
