By the end of 2024, the system will be installed at an industrial facility owned by food company IGI in Buccino, Italy.

Innovative long duration energy storage company Energy Dome plans to build its first CO₂-based thermo-mechanical energy storage plant in Sardinia, Italy, later this year.

This type of "democratic", efficient, and safe technology is attracting interest even outside Finland, and in September an interesting plant was inaugurated in Italy, in Buccino, in the province of ...

The innovative sand batteries from the Magaldi Group provide both short- and long-term thermal storage and are intended for large-scale energy storage applications.

This work aims at assessing the system-level effect on carbon emissions and social welfare of deploying large-scale energy storages in different areas of Italy, with a focus on lithium-ion batteries, while ...

The aim of this study is to investigate the long-term planning of the Italian power sector from 2021 to 2050. The key role of photovoltaic and wind technologies in combination with power-to ...

But here's the rub: intermittent solar generation creates grid instability during cloudy days, while surplus energy goes wasted during peak sunlight. Enter energy storage charging stations - the missing link in ...

Innovative long duration energy storage company Energy Dome plans to build its first CO₂-based thermo-mechanical energy storage plant in Sardinia, Italy, ...
