How can Kosovo improve its energy sector?

The Government of Kosovo aims to put its energy sector on a sustainable path, through developing renewable energy potential, improving energy efficiency, closing a 50-year-old power plant, and rehabilitating another old power plant.

Why is Kosovo importing electricity?

Kosovo has been importing electricity in order to make up some for its deficit. Despite the imports for much of the 1999-2002 electricity was not guaranteed 24 hours a day. Kosovo has the world's 5th largest proven reserves of lignite coal, with 12.5 billion tons of lignite. In 2016 8.8 million tons of coal were mined.

What percentage of energy is produced in Kosovo?

Around 90% percent of energy production in Kosovo is from lignite, a soft coal that produces toxic pollution when burnt. Official figures show Kosovo has the world's fifth largest lignite reserves of 12-14 billion tonnes. Our Standards: The Thomson Reuters Trust Principles.
