How much does a 1MW Solar System cost in Australia?

Through our database, Solar Choice has live quote pricing data for 1MW systems across all states of Australia. As an indicative guide, 1MW solar power systems can start as cheap as \$1,100,000 for a straightforward installation with cost-effective products. There are some common factors that can influence the price of an installation:

How do solar panels work in Australia?

The solar panels convert the energy from sunlight into direct current (DC) electricity, then inverters convert the power into alternating current (AC) that can be integrated into the electricity grid. LSS generation has grown rapidly in Australia and continues to hold an increasing share of Australia's total energy mix.

Why are solar panels so expensive in 2025?

Cheap systems often cost more long term due to breakdowns, inefficiency, or required replacements. In 2025, Australians have more control than ever over how they power their homes. With generous government rebates and falling technology costs, both solar and battery storage are no longer out of reach.

Is utility-scale solar cost competitive with wind energy?

Our support has helped to close the cost gap that existed between large-scale solar PV and other commercially competitive forms of power generation. As a result, utility-scale solar is now cost competitive with wind energy.

Find out what solar really costs in Australia in 2025. See average prices, rebates, battery savings, and key factors that affect your final quote.

GenCost is a leading annual economic report that estimates the cost of building new electricity generation, storage, and hydrogen production in Australia to 2050.

New analysis in the CSIRO's 2023-24 GenCost report shows the cost of large-scale solar has fallen in the past decade by 8%, while onshore wind rose 8%. Both remain the cheapest ...

See average prices paid for rooftop solar power system installations across Australia and in each state. Updated in real-time.

Through our database, Solar Choice has live quote pricing data for 1MW systems across all states of Australia.

The capital cost of LSS projects in Australia decreased by 25% between 2015 and the end of 2020 (from \$1.87 to \$1.39 per watt) according to the Clean Energy Regulator.

Australia's Commonwealth Scientific and Industrial Research Organisation (CSIRO) has revealed that large-scale solar PV capital costs have fallen by 8% in Australia for the second...
