Croatia's first large-scale battery energy storage system (BESS) with 66 MW capacity should be completed and commissioned in 2025, its investor IE Energy told Montel on Thursday.

Summary: Zagreb's power grid is undergoing a transformation with cutting-edge energy storage technologies. This article explores current projects, data-driven insights, and how innovations ...

Croatia is moving forward with its largest grid-scale battery energy storage project thanks to a new investment from the European Bank for Reconstruction and Development ...

The study will take into account the broader regional context and the accelerated growth of renewable energy sources, not only in Croatia but throughout Southeast Europe, including an ...

The development will support the installation of up to 60 megawatts of grid-connected battery storage capacity and the ...

With solar and wind projects expanding, battery storage systems--particularly lithium-ion solutions--are critical for stabilizing the grid. In 2023, Zagreb's battery investments accounted ...

The development will support the installation of up to 60 megawatts of grid-connected battery storage capacity and the deployment of a VPP platform, allowing real-time balancing of ...

Form Energy secures \$405m to advance iron-air battery technology for grid-scale storage Thu 10 Oct 2024 US firm Form Energy has secured \$405m (& #163;310m) from investors to progress ...
