Homewyse Cost Guides estimate approximate cost ranges for basic work in typical conditions. The estimates should only be used for preliminary planning.

How much does a subsurface drip irrigation system cost?

However, the lower cost to install a drip irrigation system and water conservation benefits are a big influence for some homeowners. For those who choose subsurface drip irrigation, the costs average from \$2,000 to \$4,000. Subsurface drip systems are different than standard drip irrigation, which is why they have their own category.

How much does a sprinkler system cost per acre?

The cost of a sprinkler system for 1/4 acre is \$3,000 to \$10,000, while a 1/2-acre costs \$5,000 to \$14,000. The sprinkler system cost per acre varies based on the number of zones needed, shade, and climate. Lawns in mild climates with plenty of shade may not need as many zones or sprinkler heads.

How much does a lawn sprinkler system cost in Vermont?

Lawns in Vermont are typically 17 times larger than a lawn in Nevada; the largest average in the USA. To install a lawn sprinkler system in the average size lawn of one-quarter acre costs \$3,100. The typical range is between \$2,400 and \$4,200. The minimum is usually around \$2,000, and the maximum is about \$8,500.
