Where can I find solar charging workstations?

Solar charging workstations can be found at college and corporate campuses, outdoor classrooms and offices, parks & trails, business parks, golf courses, and stadiums throughout the United States.

How much does a solar system cost?

No hassle. No gimmicks. Order a complete kit or the solar design service starting at \$449, and we will customize your system. The design fee will be credited toward your purchase. Once you choose your system and confirm the purchase order, we prepare a solar permit plan for local building and utility approval.

What is an off-grid solar kit?

An off-grid solar kit is a system that provides power from solar energy for use in locations not connected to the main power grid. Sunbolt's solar kits each have a solar powered umbrella overhead that provides power to charge your devices. They are suitable for various locations such as backyard patios and sheds, RVs and cabins. Sunbolt offers 5 Solar Kits to choose from, varying by power.

What is a Solar Carousel?

A Solar Carousel is one of three designs offered by Sunbolt for continuous electronic device charging. It complements a wide range of landscapes and architectural designs and provides charging even during power outages. Choose from the Pavilion, Arbor, or Marquee designs.
